Art Unit: 2627

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29 and 38-49 are, drawn to an optical disk having a plurality of recording power pre-recorded on a disk, classified in class 369, subclass 47.5.
- II. Claims 30-37 are, drawn to determining an error data rate, classified in class 369, subclass 53.15.

The inventions are distinct, each from the other because of the following reasons:

Inventions group one and group two are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination group one has separate utility such as an optical disk recording apparatus which does not require the use of determining an error data rate. See MPEP § 806.05(d).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NABIL Z. HINDI whose telephone number is (571) 272-7618. The examiner can normally be reached on M-F.
